Description

North Pole Elves apparently love snow cones....they eat them, and they manufacture them! "Elfin Snow Cone Works" and the accessory "Snow Cone Elves" demonstrate their hankering for the sweet frozen confection. The works is 7.25" high and 5.25" wide. Pictures will show the light has plastic holders instead of metal ones, and it's difficult to move the light far enough into the building to let the holders snap into place.
